

Contents

- 4 Director's Introduction
- 6 Translational Science at the Cambridge Research Institute
- 8 Research Highlights

Research Groups

10	James Brenton	Functional Genomics of Ovarian Cancer
12	Kevin Brindle	Molecular Imaging of Cancer
14	Carlos Caldas	Functional Breast Cancer Genomics
16	Jason Carroll	Nuclear Receptor Transcription
18	Fanni Gergely	Centrosome Biology
20	John Griffiths	Magnetic Resonance Imaging and Spectroscopy
22	Duncan Jodrell	Pharmacology and Drug Development
24	Gillian Murphy	Proteases and Tumour Microenvironment
26	Adele Murrell	Epigenetics: Genomic Imprinting and Cancer
28	Masashi Narita	Mechanisms of Cellular Senescence
30	David Neal	Urological Research
32	Duncan Odom	Regulatory Systems Biology
34	Bruce Ponder	Polygenic Predisposition to Breast Cancer
36	John Stingl	Mammary Stem Cell Biology
38	Simon Tavaré	Computational Biology and Statistics
40	David Tuveson	Tumour Modelling and Experimental Medicine
42	Fiona Watt	Keratinocytes in Normal Tissue and in Tumours
44	Doug Winton	Cancer and Intestinal Stem Cells

Core Facilities

46	Introduction
47	Bioinformatics (Matthew Eldridge)
48	Biological Resources Unit
49	Biorepository (Bob Geraghty)
50	Equipment Park (Jane Gray)
51	Flow Cytometry (Greg Veltri/Richard Grenfell)
52	Genomics (James Hadfield)
53	Histopathology and <i>In Situ</i> Hybridisation (Will Howat)
54	Light Microscopy (Stefanie Reichelt)

55	Theses
56	Research Publications
64	External Funding
66	Seminars and Conferences
68	Cambridge Cancer Centre
69	Outreach
70	Academic Administration
72	Institute Administration
74	Career Opportunities
